PROFESSIONAL SUMMARY

Full-Stack Developer & AI/Agentic Systems Engineer with hands-on experience building end-to-end web applications and LLM-powered multi-agent systems. Proficient in Python (FastAPI), React.js, React Native, Node.js, TypeScript, and LangChain/LangGraph. Proven ability to ship production-ready features across frontend, backend, and AI integration layers. Seeking a role where I can contribute to AI-native product development and scalable full-stack architecture.

TECHNICAL SKILLS

AI & Agents: LangChain, LangGraph, Hugging Face (AI Agents), Prompt Engineering, Multi-Agent Systems, RAG, LLMs (GPT, Claude, open-source)

Frontend: React.js, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion

Backend: Python, FastAPI, Node.js, Express.js, PHP, REST API Development

Database: MySQL, Firebase Firestore, Relational Database Design

Tools & DevOps: Git, GitHub, Docker, RunPod, Linux

Concepts: Multi-Agent Architecture, Agentic Workflows, Prompt Engineering, WebSockets, SPA Navigation

INTERNSHIP EXPERIENCE

Web Developer Intern | Prasunet

July 2024 – August 2024

- Built responsive UI components using HTML5, CSS3, and JavaScript (ES6+); improved cross-browser performance and page load times.
- Collaborated in an Agile team to ship new features and resolve production bugs in live web environments.
- Optimised web pages for SEO-readiness and performance, achieving consistent cross-browser compatibility.

Full Stack Developer Intern | InnoByte Services

March 2024 – April 2024

- Engineered end-to-end web features using PHP and MySQL, covering both frontend interfaces and backend business logic.
- Designed normalised relational database schemas to support dynamic, data-driven web applications.
- Integrated RESTful APIs ensuring seamless, secure data flow between client and server layers.

PROJECTS

Interactive 3D Galaxy Generator — Three.js, WebGL, JavaScript (ES6+), JSON, CSS3

- Engineered a real-time cosmic simulator rendering 100,000 star particles at 60 FPS using trigonometric spiral math. Leveraged BufferGeometry and typed arrays (Float32Array) to compress 300,000+ coordinates into a single GPU draw call linked to a centralised JSON config pipeline.

Resume Reviewer — Python, Streamlit, LangChain, Pydantic, PyPDF2, Gemini SDK

- Developed a full-stack LLM application that extracts raw text from PDF resumes using PyPDF2 and generates structured feedback, using Pydantic parsing and a Streamlit UI to present ATS-aligned rewrite tips.

Code-Agent — LangChain, Hugging Face, LlamaIndex, Gemini SDK, ReAct, RAG

- Built an AI agentic framework using LangChain and Hugging Face implementing the ReAct pattern, tool use, and zero-shot prompting across Gemini, OpenAI, and Anthropic APIs, with LlamaIndex RAG and system message guardrails.

Chatbot Memory — LangChain, Streamlit, LLMs, Prompt Engineering, State Management, Token Optimization

- Developed an interactive chatbot using Streamlit and LangChain, implementing a dual-memory toggle between ConversationBufferMemory (high precision) and ConversationSummaryMemory (up to 40% token optimisation).

LLM Validator — [LangChain](#), [Pydantic](#), [Python](#), [GenAI SDK](#), [Structured Outputs](#), [JSON Schema](#)

- Developed a data validation middleware and self-healing pipeline forcing LLMs to return strict, type-safe JSON, bridging the gap between unpredictable AI output and production code to guarantee schema compliance.

RAG App — [LangChain](#), [ChromaDB](#), [Gemini API](#)

- Built a local Retrieval-Augmented Generation (RAG) pipeline using LangChain, ChromaDB, and the Gemini API, optimising semantic search and integrating workflows into messaging platforms like WhatsApp.

EDUCATION

Bachelor of Technology (B.Tech)

Chandigarh University, Chandigarh | Graduated: 2021

CERTIFICATIONS

- **Foundation: Introduction to LangGraph** — LangChain Academy (Python)
- **Foundation: Introduction to LangChain** — LangChain Academy (Python)
- **Foundations of Agents** — Hugging Face Agents Course
- **JavaScript and React Bootcamp** — DevTown
- **Python 101** — Udemy
- **PHP for Beginners** — Great Learning
- **Arrays and Linked Lists with C++ Bootcamp** — Microsoft Learn Student Ambassador

TRAINING

MySQL – Relational Database Management | [Linux World Information Pvt. Ltd.](#)

- Completed hands-on training in MySQL database design, querying, joins, indexing, and optimisation on Linux.

Computer Network Basics | [Uma Electronics Institute](#)

- Gained foundational knowledge of networking protocols, OSI model, IP addressing, and LAN/WAN configurations.
